

Greenway Secure Cloud

powered by AWS

Overview of Benefits

✔ AWS-Powered Infrastructure

Leverage the global scale, reliability, and compliance of AWS Public Cloud—recognized as the ‘Best in KLAS’—to ensure your data is protected in state-of-the-art, HIPAA-compliant environments.

✔ Enterprise-Grade Security & Monitoring

Get 24/7 real-time monitoring, advanced threat detection, and proactive vulnerability management with industry-leading protocols and dedicated support.

✔ Automatic Updates

Stay current and compliant with automatic software upgrades—no manual intervention required.

✔ Operational Simplicity

Eliminate server maintenance, reduce IT overhead, and simplify billing with predictable pricing and bundled services.

✔ Accelerated Innovation

Quickly adopt new features and functionality through scalable, cloud-based infrastructure.

Smarter, Safer, Simpler: The Cloud Solution Built for Healthcare

With Greenway Secure Cloud on AWS, your practice gains enterprise-level protection, simplified operations, and the agility to grow—without the hassle of managing on-premise infrastructure. This solution delivers peace of mind, so your team can concentrate on patient care, not IT management.

- **Scalable infrastructure that adapts to your practice's needs, without hardware limitations**
- **Multi-factor authentication (MFA) to enhance data security**
- **Transparent, predictable pricing with no upfront costs**
- **Continuous compliance with automatic system updates**
