

Greenway[®] Revenue Analytics

Greenway Revenue Analytics puts the **power of clarity in your hands**. Gain instant visibility into payments, denials, and A/R performance with near-real-time data - so you're never left guessing about your revenue cycle.

Greenway Revenue Analytics transforms complex financial data into intuitive dashboards that streamline reporting and surface actionable insights.

The result? Smarter decisions, stronger financial performance, and the confidence to scale your practice without limits.

Overview of Benefits

✔ Automate and Simplify Reporting

Replace hundreds of manual reports with automated, near-real-time dashboards. Standardized metrics and visualizations free your teams to focus on insights, not spreadsheets.

✔ Unlock Multi-Level Revenue Insights

Track charges, payments, and adjustments by service or posted date.

Understand payment timing, denial drivers, and clean-claim performance through interactive dashboards.

✔ Enhance Financial Transparency

Break down A/R by payer, patient, or responsible party and uncover trends over time. Identify workflow strengths, underpayments, and collection performance.

Transform revenue data into financial intelligence.

Most practices don't lack data—they **lack clarity**. Greenway Revenue Analytics converts complex financial information into actionable intelligence that empowers your team to improve performance at every step of the revenue cycle.

Analyze claim activity, clean-claim rates, and denial behavior with intuitive dashboards. Drill into root causes and uncover patterns through interactive heatmaps for charges, payments, and adjustments. With faster, clearer visibility, you can stop revenue leakage before it occurs.

The impact: Enhanced data visibility throughout the revenue cycle, and deeper insights into financial performance—providing a stronger foundation for informed decision-making.

Key capabilities designed to accelerate cash flow and improve financial performance:

- Near-real-time A/R and denial management dashboards
- Claim management analytics: clean claim rate, denial trends, and CCR by submission date
- Interactive heatmaps for charges, payments, and adjustments
- Automated data consolidation and reporting
